Mercury
March 3rd, 2022

Dear Olena Bednarchuk,

Hello, my name is Andrew I'm a Front End Web Developer based in Toronto. I'm applying for the Front End Engineer position at Mercury. As a former small business owner I am very passionate about eCommerce and eFinance. I'd like to work with a company that helps startups and people pursue their dreams. I am also a big fan of parakeets.

My front end skills include HTML5, CSS3/SCSS, Javascript, React, responsive and accessible design, REST APIS, Github and Firebase. I've been studying and working in the industry for many years and am hoping to stay focused on React based eCommerce or other marketplace software.

I work mainly in agile environments doing paired programming, group work or solo work. I'm self motivated and dedicated to learning and growing in the industry. I also have previous career experience in management and sales which has allowed me a deep understanding of working alongside other people.

Is there a way I could set up an interview? Let me know, I will respond as soon as I can.

Thank you!

Andrew Craig
