To whom it may concern,

Hello, my name is Andrew, I'm a Front End Web Developer based in Toronto. I'm applying for the Junior Programmer position offered by U of T. In my recent contract I worked with a database of medical students and CRM that supported them. I think the work would be very comparable to the welfare data administration described in the job description.

My front end tools include HTML5, CSS3/SCSS, Javascript, React, responsive and accessible design, REST APIS, Github and Firebase. I am also familiar working with Django (python), Figma and Jira.

In the past I have canvassed for Canadian Feed the Children, held an office position working for World Vision and have volunteered at Covenant House in Toronto. My sister is a church youth co-ordinator so I have learned a lot from helping her.

 I think I would be a great fit for the role! Is there a way I could set up an interview?

Thank you,

Andrew Craig
